

pool_interface< T,
Alloc >

```
graph BT; A[pool_none< T, Alloc >] --> B[pool_interface< T, Alloc >];
```

The diagram illustrates a relationship between two C++ template classes. At the bottom is a box labeled 'pool_none< T, Alloc >' with a light gray background. A blue arrow points vertically upwards from this box to a box above it labeled 'pool_interface< T, Alloc >' which has a white background. This indicates that 'pool_none' inherits from or specializes 'pool_interface'.

pool_none< T, Alloc >
